DS	**Session**	Graph	**Question Information**	Level 1 Challenge 83

Question description

A game consists of n rooms and m teleporters. At the beginning of each day, you start in room 1 and you have to reach room n.

You can use each teleporter at most once during the game. How many days can you play if you choose your routes optimally?

Constraints

- 2≤n≤500
- 1≤m≤1000
- 1≤a,b≤n

Input

The first input line has two integers nn and mm: the number of rooms and teleporters. The rooms are numbered 1,2,…,n.
After this, there are mm lines describing the teleporters. Each line has two integers aa and bb: there is a teleporter from the room a to room b.
There are no two teleporters whose starting and ending rooms are the same.

Output

First print an integer k: the maximum number of days you can play the game. Then, print k route descriptions according to the example. You can print any valid solution.

Logical Test Cases

Test Case 1

Test Case 2

INPUT (STDIN)

```
6 7
1 2
1 3
2 6
3 4
3 5
4 6
5 6
```

EXPECTED OUTPUT

```
2
4
1 3 5 6
3
1 2 6
```

INPUT (STDIN)

```
6 7
1 2
2 3
3 6
4 4
4 5
5 6
5 6
```

EXPECTED OUTPUT

```
1
4
1 2 3 6
```

Mandatory Test Cases

Test Case 1

KEYWORD

```
int bfs(int n,int s,int t)
```

Complexity Test Cases

Test Case 1

CYCLOMATIC COMPLEXITY

```
7
```

Test Case 2

TOKEN COUNT

```
920
```

Test Case 3

NLOC

```
110
```
